

RESTRICTED ACCESS STRETCHER

Part of the rescue equipment range from Lyon Equipment

The Lyon RESTRICTED ACCESS STRETCHER was developed specifically for the difficult conditions experienced during restricted access rescue.

The stretcher has options for either a reclined or seated casualty position for suspension and slide type evacuations, as well as completely flat for movement through restricted spaces.

[See overleaf for detailed product features](#)

CODE	MATERIAL(S)	CONFORMITY
LSYNRAS MK2	RESTRICTED ACCESS STRETCHER	Low density polyethylene (body) CE 93/42/EEC Class 1, EN1498 class B

Lyon Equipment design, manufacture and supply high quality and innovative, adventure, work at height and specialist rescue equipment - delivering expert advice on all our products and their applications

Product features:

- A deep wrap-around shape provides increased impact protection for critical head and torso areas
- A profile head end to ensure minimal size for rapid deployment
- Manoeuvring handle cut-outs for ease of use and a smooth, snag-free skid base for sliding over flooring and machinery
- Colour coded, quick release chest and leg straps as well as extra-long harness straps to enable effective positioning and connection in difficult locations
- The robust, pre-fitted adjustable rope bridle has a captive attachment ring and twist lock connectors
- Four-point attachment for connection to vertical lifting, lowering and suspension systems
- Conversion to rope loop handles for dragging and manoeuvring the stretcher around obstructions
- To ensure a long life, a selection of easily replaceable parts are available, with servicing available on request
